

Mediteq Forum Digital

India Medical device regulations 2023 & Recent changes

Are you excited to learn about India's fastest-growing medical device market?

Indian culture is extremely diverse and so is its medical device market. Due to the relatively low cost of medical care in India, it is experiencing a 22-25% growth and contributes over \$2Bn to the healthcare market in India.

India is the 4th largest market for medical devices in Asia, among the top 20 markets for medical devices worldwide. The Indian medical regulatory system has become more complicated in recent years. In the past, medical devices did not need to be approved at all, but that is not the case today. Indian medical device regulations have seen many recent advancements thereby providing adequate guidance to manufacturers and the authorities to ensure patient safety.

During this **Mediteq Forum activity** our guest **Nishant Paliwal** from the company **HCL** will provide insight into the regulatory requirements for India and in particular, the changes introduced and released in **July 2022**.

Date: 25th April 2023

Time: 3 - 4.30 pm

Digital: Zoom link will be sent closer to the date
